Discipline/Trade	MECHANICAL ENGINEERING
Semester	Fourth
Subject Name	Computer Aided Drafting
Lession Plan Duration:	15 WEEKS
Work Load per week (in H	Practical
work Load per week (in h	

	Theory			
Week	Day	Topics to be covered (Including Assignments/Tests)		
1	(UNIT 1) Day1	Introduction to Computer Aided Drafting (2D) commands of any one software (Auto CAD, ProE, Solid works, Unigraphics etc.) Concept of AutoCAD, Tool bars in CAD software, coordinate system, snap, grid, and ortho mode (Absolute, Relative and Polar), setting of units and layout. Drawing commands – point, line, arc, circle, ellipse,		
	Day 1	Editing commands – scale, erase, copy, stretch, lengthen and explode. Dimensioning and placing text in drawing area		
2	Day 1	Sectioning and hatching Inquiry for different parameters of drawing entity		
_	Day 1	Create layers within a drawing Specifying Geometrical Dimensioning & tolerance (GD&T) parameters in drawing		
	(UNIT 2) Day 1	Detail and assembly drawing of the following using Drafting Software Plummer Block Wall Bracket		
3	Day 1	Stepped pulley, V-belt pulley Flanged coupling		
	Day 1	Machine tool Holder (Three views) Screw jack, joints, crank shaft and piston.		
4	(UNIT 3) Day 1	Isometric Drawing by CAD using any part modeling Software (3D) Drawings of following on computer:- Cone, Cylinder		
5	Day 1	Cube, Spring, Isometric view of objects		

1	I ſ	
	-	
	(UNIT 4) Day 1 -	Introduction to any part modeling software (ProE, Solid works, AutoCAD, Uni Graphic, Catia etc.) Introduction to Sketcher: Sketch Entities, Sketch Tools, Blocks, Dimensioning Part modeling (4 models) Part Modeling Tools:- Creating reference planes Creating Extrude features Creating Revolve Creating Swept features Creating Loft features
	Day 1	Creating Reference - points, axis, coordinates Creating curves Creating Fillet features Inserting Hole types Creating Chamfer
6	Day 1	Creating Shell Creating Rib Environment& Utilities - Working with views and manipulating views. Create parts e.g. Piston, Pin, Bolts and Nuts, Fixture, Jig parts, Washer, Rings, Gaskets parts etc.
	(UNIT 4.2) Day 1	Assembly and Simulation, Assembly Modeling Tools:- Introduction to Assembly Modeling & Approaches – Top down and Bottom up approach,
7	Day 1	Applying Standard Mates- Coincident, Parallel, Perpendicular, Tangent, Concentric, Lock, Distance, Angle. Assemble of any two Mechanism e.g. Crank slider mechanism,
8	Day 1	Piston and Cylinder assembly, Quick Return Mechanism (QRM), Machine vices, Crank Shaft, Bearing assembly, any other mechanism.

Discipline/Trade MECHANICAL ENGINEERING Semester Fourth Subject Name Hydraulic and Pneumatics Lession Plan Duration FIFTEEN WEEKS

Work Load per week (in Hours) Lecture -03 ,Practical -02

		Theory		Practical
Week	Lecture	Topics to be covered (Including	Practical	Practical Topic to be Covered
	Day	Assignments/Tests)	Day	
		Introduction: Introduction to Hydraulics and		
		Pneumatics. fluids, types of fluid; properties of		
	(UNIT 1)1	fluid viz. mass density, weight density (specific		
		weight), specific volume, capillarity, specific		
1		gravity and their units	(P-1)1	Measurement of pressure head by
	2	Properties of fluid- viscosity, compressibility, surface tension and their units	2	employing Piezometer tube
	2		2]
		Properties of fluid- kinematic viscosity and dynamic viscosity and their units, Numerical		
	3	problems	3	
	5	Pressure and its Measurement: Concept of	5	
		pressure ,Intensity of pressure, static pressure		
	(UNIT 2)4	and pressure head, Types of		
	(-)	pressure(Atmospheric Pressure, gauge		Measurement of pressure head by
2		pressure, Absolute pressure)	4	employing Simple U-tube
		Pressure measuring devices: Manometers-		manometer
	5	Piezometer, simple U-tube	5	
		Pressure measuring devices: Micromanometer,		
	6	differential U-tube, Inverted U-tube,	6	1
		Manometer Construction, working and		
	7	application of Bourdon pressure gauge	7	
		Simple numerical problems of Bourdon tube		Measurement of pressure head by
3	8	pressure gauge	8	employing Bourdon's tube pressure
		Diaphragm pressure gauge, dead weight		gauge
		pressure gauge, Construction, working and		
	9	applications, Statement of Pascal's law and its applications.	9	
	10	Assignment of Unit 1,2	(P-2)10	
	10	Flow of Fluids: Types of fluid flow – steady and	(P=2)10	
4		unsteady, uniform and non- uniform, laminar		
4	(UNIT 3)11	and turbulent; rate of flow and their units	11	Verification of Bernoulli's theorem.
		Continuity equation of flow, Hydraulic energy		
	12	of a flowing fluid; total head	12	
-		Bernoulli's theorem (statement and and its		
5		applications), Discharge measurement with the		Measurement of flow by using venturimeter
	13	help of venturi-meter,	(P-3)13	venturimeter

l	14	Discharge measurement with the help of orificemeter,Pitot tube	14		
	15	Limitations of Bernoulli's theorem, Simple Problems of flow of fluids	14		
		Pipe and pipe flow, wetted perimeter, hydraulic mean depth, hydraulic gradient; loss			
6	16	of head due to friction Chezy's equation and Darcy's equation of head	16	Revision of 1st and 2nd practical	
	17	loss (without proof) Reynold's number and its effect on pipe	17		
	18 19	friction; Water hammer Simple numerical problems on pipe friction	18 (P-4)19		
7	20	Nozzle – definition, Velocity of liquid flowing through the nozzle, power developed	20	To find out the value of coefficient	
,		Hydraulic Machines: Description, operation and application of hydraulic press, hydraulic		of discharge for a venturimeter.	
	(UNIT 4)21	jack	21		
	22	Description, operation and application of hydraulic accumulator and brake	(P-5)22	To find coefficient of friction for a	
8	23	Description, operation and application of hydraulic ram, hydraulic door closer	23	pipe (Darcy'sequation).	
	24	Revision of Unit 3,4	24	-	
	25	Assignment/Test of Unit 3,4	(P-6)25		
		Pumps and Water Turbines: Concept of	(1 0)25	To study a single stage centrifuga	
0	(UNIT 5)26	hydraulic pump, Classification of pumps	26	pump and reciprocating pump for	
9		Construction, operation and application of		constructional details with the help	
		Single acting reciprocating pump ,vane, screw		of cut section models	
	27	and gear pumps	27		
		Construction, operation and application of			
	28	centrifugal pump.	(P-7)28		
10		Trouble shooting and problems in centrifugal		Study the working of Pelton wheel, Francis turbine with the help of	
10	20	pumps and remedial measures, pitting,		working model	
	29	cavitation, priming	29		
	30	Concept of a turbine, classification of turbines,	30	1	
	31	Types of turbines - impulse and reaction type (concept only), difference between Turbines	31	Church the suppline of Keyley to white	
11	32	Construction and working of pelton wheel	32	Study the working of Kaplan turbine with the help of working model	
	33	Construction and working of Francis turbine	33		
	34	Construction and working of Kaplan turbine	(P-8)34		
		Oil power Hydraulic and Pneumatic systems:			
12	(UNIT 6)35	Introduction to oil power hydraulics and pneumatic system.	35	Study of hydraulic circuit of any available machine or working	
		Relative Merits and Demerits as oil power		model	
	36	hydraulic and pneumatic system	36		
13		Industrial applications of oil power hydraulic			

	38	Basic components of hydraulic system, definition and functions of each component in a hydraulic circuit.	(P-9)38	Study of pneumatic circuit of any available machine or working
		Hydraulic oils- Classification and their properties. Seals and packing- classification of		model
	39	seals, sealing materials	39	
		Maintenance of hydraulic system: common faults in hydraulic system, simple visual checks		
	40	of oil	40	
14	41	Causes of contamination, preventive measures.	41	Dovicion of 4th and 5th practical
14		Basic Components of Pneumatic Systems, definition and functions of each component in a Pneumatic circuit, Necessity of Filter,		Revision of 4th and 5th practical
	42	Regulator and Regulator(FLR)	42	
	43	Common problems in pneumatic systems.	43	
15	44	Maintenance schedule of pneumatic systems.	44	Revision of 6th and 7th practical
	45	Assignment/Test of Unit 5,6	45	

Discipline/Trade	MECHANICAL ENGINEERING		
Semester	Fourth		
Subject Name	Industrial Engineering		
Lession Plan			
Duration	FIFTEEN WEE	KS (From Jan 2020 to April 2020)	
Work Load per week (in Hours)		Lecture -	
WOIK LOad per week	(III Hours)	03	

		Theory
Week	Lecture Day	Topics to be covered (Including Assignments/Tests)
	(UNIT 1)1	Productivity: Introduction to productivity, factors affecting productivity
1	2	Practical measurement of productivity, difference between production and productivity
	3	causes of low productivity, methods to improve productivity
	4	Contribution of standardization in improving productivity
2	(UNIT 2)5	Work Study: Definition and scope of work study, factors for selection of work study job
	6	Inter-relation between method study and work measurement
	7	Human aspects of work study, uses and limitation of work study
3	8	Role of work study in improving productivity.
	(UNIT 3)9	Method Study: Method Study and its basic introduction
	10	Objectives and procedure for Method analysis
4	11	Information collection and recording techniques
	12	Assignment of Unit 1,2
	(UNIT 4)13	Motion Analysis: Principles of Motion analysis
5	14	Therbligs and SIMO charts
	15	Normal work area(Principle of motion economy)
	16	Ergonomics , design of tools and equipment
6	17	Design and arrangement of work places
	(UNIT 5)18	Work Measurement: Objectives; work measurement techniques
	19	stop watch time study
7	20	Principle, equipment used and procedure
	21	systems of performance rating discussion
	22	standard elements of time, calculation of basic times
8	23	various allowances used in work measurement
	24	guide for rest allowances in indian conditions
	25	calculation of standard time, work sampling, standard data and its usage
9	26	Assignment of Unit 3,4
	(UNIT 6)27	Wages and Incentive Scheme: Introduction to wages
	28	Wage payment for direct and indirect labour
10	29	wage payment plans and incentives
	30	various incentive plans, incentives for indirect labour
11	31	Production Planning and Control introduction

	32	objectives and components (functions) of P.P.C
	33	Advantages of production planning
(UNIT 7)34		Production Planning and control: production and its types, batch and continuous
12		Advantages, objective and components of production planning and production control, stages of
12	35	P.P.C
	36	Process planning, routing, scheduling, dispatching, follow up
		Routing purpose, route sheets, scheduling purpose, machine loading chart, dispatching –
4.2	37	purpose, and procedure
13	38	Structure and function of production, planning departments, Gantt chart.
	39	CPM/PERT technique, drawing of simple networks and critical time calculation.
	40	Production control in job order, batch type and continuous type production, its difference
14	41	Revision
	(UNIT 8)42	Store Management: different layout and structure of stores, inventory control
	43	Calculations of EOQ, Bin cards
15	44	various forms required in stores for documentation, purchase procedures
	45	Assignment/Test of unit 5,6

SUBJECT NAME	THERMODY	YNAMIC-II		
Branch	Mechanical Engineering	5th SEM		
CHAPTER SR.NO.	CHAPTER/UNIT NAME	SUBJECT SUBTOPIC SR.NO.	SUBJECT SUBTOPIC NAME	PRACTICAL NAME
1	IC ENGINE	1.1	Introduction	Dismantle an IC engine and various parts,
		1.2	Working principle of two stroke and four stroke cycle, SI engines and CI engines,	removal and fitting of piston, crank shaft ovality and assemble it.
		1.3	Location and functions of various parts of IC engines and materials used for them	rings, measuring of bore size,
2	Fuel Supply and Ignition System in Petrol Engine	2.1	Concept of carburetion	Dismantle a carburetor
		2.2	Air fuel ratio	1
		2.3	Simple carburetor and its limitations and application.	
	ļ!	2.4	Description of battery coil and	1
		2.5	electro ignitionsystem, fault finding/ and	
		2.6	Description of petrol injection system	
	ļ!	ļ		Servicing of petrol injection system
3	Fuel System of Diesel Engine	3.1	Components of fuel system	Valve servicing, grinding
		3.2	Description and working of fuel feed pump	
		3.4	Injectors	4
4	Cooling and Lubrication	4.1	Function of cooling system in IC engine	mechanism and tappet adjustment.
		4.2	Air cooling and water cooling system, use of thermostat and radiator.	Inspection of ignition sy
		4.3	Function of lubrication	stressing ignition timings,
		4.4	Types and properties of lubricant	setting, fixing order and contact breaker;
		4.5	Lubrication system of engine	
		4.6	Fault finding in cooling and lubrication and remedial action	gap adjustment, spark plug cleaning.
5	Testing of IC Engines	5.1	Engine power - indicated and brake power	Service of cooling & lub
		5.2	5.2 Efficiency - mechanical, thermal. relative and volumetric	note down the functioning/testing of various

		5.3	5.3 Methods of finding indicated and brake power	
		5.4	5.4 Morse test for petro1 engine	
		5.5	5.5 Heat balance sheet, simple numerical problems	Determination of BHP by dynamometer.
		5.6	Concept of pollutants in SI and CI engines	
6	Steam Turbines and Steam Condensers	6.1	Function and use of steam turbine	Morse test on multi-cylinder petrol engine.
		6.2	Steam nozzles - types and applications	
		6.3	Steam turbines - impulse, reaction, simple and compound, construction and working principle	
		6.4	Governing of steam turbines	
		6.5	Function of a steam condenser, elements of condensing plant	
		6.6	Classification - jet condenser, surface condenser	Draw layout of modern a workshop .
		6.7	Cooling pond and cooling towers	
7	Gas Turbines and Jet Propulsion	7.1	Classification, open cycle gas turbine and closed cycle gas turbine	
		7.2	Open cycle constant pressure gas turbines	
		7.3	Closed cycle gas turbines, PV and TS diagram and working	
		7.4	Principle of operation of ram- jet engine and turbo jet engine - a	Local visit to roadways workshop.
		7.5	Rocket engine - its principle of working and applications	

Govt. Polytechnic Nanakpur

		Discipline : Mechanical Engineering Semester : 4th Subject : Workshop Technology-II Lesson Plan Duration: 15 Weeks			
Week		Theory			
	Lecture	Торіс			
	Day	(Including assignment/test)			
	1 2	Cutting Tools and Cutting Materials Cutting Tools - Various types of single point cutting tools and their uses,			
Ι	3	Single point cutting tool geometry, tool signature and its effect, Heat produced during cutting and its effect, Cutting speed, feed and depth of cut and their effect			
	4	Cutting Tool Materials - Properties of cutting tool material, Study of various cutting tool materials viz. High-speed steel,			
	5	tungsten carbide, cobalt steel cemented carbides, satellite, ceramics and diamond			
II	6	Lathe: Principle of turning			
	7	Function of various parts of a lathe			
	8	Classification and specification of various types of lathe			
	9	Classification and specification of various types of lathe			
III	10	Work holding devices			
	11	Lathe tools and operations: - Plain and step turning, facing, parting off			
	12	Assignment			
	13	reaming, boring, threading, knurling, form turning, spinning			
IV	14	Cutting parameters – Speed, feed and depth of cut for various materials			
	15	Cutting parameters –			

		for various operations, machining time.
	16	Speed ratio, preferred numbers of speed selection
V	17	Lathe accessories:- Centres, dogs, different types of chucks, collets,
	18	Lathe accessories:- face plate, angle plate, mandrel, steady rest, follower rest, taper turning
	19	tool post grinder, milling attachment, Quick change device for tools.
	20	Assignment
	21	Introduction to capstan and turret lathe
VI	22	Assignment on Chapter 1,2 and queries related to chapter Ist and Kind
	23	Drilling: Principle of drilling.
		Classification of drilling machines
	24	and their description.
	25	Various operation performed on drilling machine – drilling, spot facing,
	26	reaming, boring, counter boring, counter sinking, hole milling, tapping.
VII	27	hole milling, tapping. Speeds and feeds during drilling, machining time.
	28	impact of these parameters on drilling
	29	Types of drills and their features,
VIII	30	nomenclature of a drill,
	31	Assignment
	32	Drill holding devices.
	33	Boring: Principle of boring
IX	34	Classification of boring machines and their brief description.
	35	Revision of Chapter 1

37Shaping, Planning and Slotting:38Working principle of shaper, planer and slotter39Type of shapers40Type of planers41Types of tools used and their geometry.42Speeds and feeds in above processes43Broaching: Introduction, Types of broaching machines44- Single ram and duplex ram45horizontal type,46vertical type pull up, pull down, push down.XIIElements of broach tool, broach tooth details - nomenclature, types, and tool material.XIIIJigs and Fistures: Importance and use of jigs and fixture51Clamping devices51Clamping devicesXIIV5254Function of cutting fluid Assignment		36	Boring tools, boring bars and boring heads.
X39Type of shapers40Type of planers41Types of tools used and their geometry.XI41Types of tools used and their geometry.42Speeds and feeds in above processes43Broaching: Introduction, Types of broaching machines - Single ram and duplex ram horizontal type,45horizontal type,46vertical type pull up, pull down, push down.XIII4748Jigs and Fixtures: Importance and use of jigs and fixtureXIII5051Clamping devices51Speeds of jigs and fixturesXIII5253Cutting Fluids and Lubricants:XIIV5354Function of cutting fluid		37	Shaping, Planning and Slotting:

	XIV	53	Cutting Fluids and Lubricants:
55 Assignment		54	Function of cutting fluid
		55	Assignment

	56	Types of cutting fluids
	57	Difference between cutting fluid and lubricant
XV	58	Selection of cutting fluids for different materials and operations
	59	Common methods of lubrication of machine tools
	60	Revision

	Lesson Plan
Discipline	: Mechanical Engg.
Semester	: 4TH
Subject	: M.M.
Lesson plan duration :	15 weeks

Week		Theory		Practical
	Lecture Day	Topic (including assignments /tests)	Practical Day	Торіс
Week1	1 _{st}	Introduction: Material, History of Material Origin,	1 _{st}	Classification of about 25 specimens of materials/machine parts into(i) Metals and non metals (ii) Metals and alloys
	2 _{nd}	Scope of Material Science, different engineering materials and applications	2 _{nd}	Classification of about 25 specimens of materials/machine parts into(i) Metals and non metals
	3rd	Classification of materials & difference between Metal & Non Metal		(ii) Metals and alloys / Practical Work
	4 _{th}	Present and future needs of materials, Overview of Biomaterials and semiconducting materials		
Week2	1st	Various issues of Material Usage- Economical, Environment and Social.	1 _{st}	Given a set of specimen of metals and alloys (copper, brass, aluminum, cast iron, HSS, Gun metal); identify and indicate the various properties possessed by them. / Theory Work
	2 _{nd}	Assignment	2 _{nd}	Given a set of specimen of metals and alloys (copper, brass, aluminium, cast
	3rd	Crystallography: Fundamentals: Crystal, Unit Cell, Space Lattice		iron, HSS, Gun metal); identify and indicate the various properties possessed by them. / Practical Work
	4 _{th}	Arrangement of atoms in Simple Cubic Crystals		
Week3	1 _{st}	Arrangement of atoms in BCC	1st	Study of heat treatment furnace. / Theory Work
	2 _{nd}	FCC and HCP Crystals		
	3rd	Number of atoms per unit Cell, Atomic Packing Factor		Study of heat treatment furnace. / Practical Work
	4 _{th}	Revision	1	
	1st	Overview of deformation behaviour	1 _{st}	Study of a metallurgical microscope /

		and its mechanisms,	Theory Work
	2nd	Behavior of material under load and	
Week4		stress-strain	

	3rd	Failure Mechanisms: Overview of		
		failure modes,		
	4 _{th}	Fracture	2nd	Study of a metallurgical microscope /
			210	Practical work
Week5	1st	fatigue and creep.	1 st	Study of Specimen polishing Machine
	2nd	Assignment		/ Theory Work
	3rd	Metals And Alloys: Introduction:		
		History and development of iron		
	4_{th}	History and development of steel,	2nd	Study of Specimen polishing Machine
		Different iron ores,		/ Practical Work
Week6	1 _{st}	Introduction: History and development of iro	1 st	To prepare specimens of following materials
	2nd	Basic Process of iron-making and		
		steel-making,		
	3rd	Classification of iron	2nd	To prepare specimens of following
	4_{th}	Classification of steel		materials for microscopic examination and
Week7	1 _{st}	Cast Iron: Different types of Cast Iron,	1 st	To prepare specimens of following
		manufacture and their usage.		materials for microscopic examination and
	2nd	Steels: Steels and alloy steel,		to Examine the microstructure of the
	3rd	Classification of plain carbon steels	2nd	To prepare specimens of following
	4_{th}	Availability, Properties and usage of		materials for microscopic examination and
		different types of Plain Carbon Steels		to Examine the microstructure of the
Week8	1 _{st}	Effect of various alloys on properties	1 st	To anneal a given specimen and find
		of steel,		out difference in hardness as a result of
	2nd	Uses of alloy steels (high speed steel,		annealing. / Theory Work
		stainless steel,)		
	3rd	Uses of alloy steels (spring steel,	2nd	To anneal a given specimen and find
		silicon steel)		out difference in hardness as a result of
	4_{th}	Non Ferrous Materials: Properties and		annealing. / Practical Work
		uses of Light Metals and their alloys		
Week9	1 st	Properties and uses of White Metals	1 _{st}	To normalize a given specimen and
		and their alloys		to find out the difference in hardness as a
	2nd	Assignment		result of normalizing / Theory Work
	3rd	Test	2nd	To normalize a given specimen and
	4_{th}	Revision		to find out the difference in hardness as a
Week10	1 st	Theory of Heat Treatment: Purpose of	1 st	Classification of about 25 specimens
		heat treatment		of materials/machine parts into
	2nd	Solid solutions and its types,		(iii) Ferrous and non ferrous metals (iv)
	3rd	Iron Carbon diagram,	2nd	Classification of about 25 specimens
	4_{th}	Formation and decomposition of		of materials/machine parts into
		Austenite, Martensitic Transformation		(iii) Ferrous and non ferrous metals (iv)
Week 11	1 _{st}	Simplified Transformation Cooling	1 st	To harden and temper a specimen and to fin
		Curves		
	2nd	Processes hardening, tempering,		
	3rd	Annealing	2nd	To harden and temper a specimen
	4 _{th}	Normalizing		and to find out the difference in hardness
Week 12	1 _{st}	Case hardening	1 st	Practice And VIVA VOCE
	2nd	Surface hardening		
	3rd Types of heat treatment furnaces		2nd	Practice And VIVA VOCE
		required for above operations		
	4_{th}	Revision & Assignment		

Week 13	1st	Engineering Plastics: Important sources of plastic	1 _{st}	Practice And VIVA VOCE
	2nd	thermoplastic and thermo set and their uses		
	3rd	Various Trade names of engg. Plastics,	2nd	Practice And VIVA VOCE
	4_{th}	Plastic Coatings		

Week 14	1 _{st}	Advanced Materials: Composites-	1 st	Practice And VIVA VOCE
		Classification, properties, applications		
	2nd	Ceramics-Classification, properties, applications, Heat insulating materials		
	3rd	Miscellaneous Materials: Properties and uses of Asbestos, Glass wool	2 _{nd}	Practice And VIVA VOCE
	4_{th}	Thermocole cork, mica		
Week 15	1 _{st}	Overview of tool and die materials, Materials for bearing metals,	1 _{st}	Practice And VIVA VOCE
	2nd	Spring materials		
	3rd	Materials for Nuclear Energy, Refractory materials.	2 _{nd}	Practice And VIVA VOCE
	4 _{th}	Revision		

Govt Polytechnic, Nanakpur
