## **LESSON PLAN**

Semester: First Subject: Engineering

### GraphicsLesson Plan Duration: 16 Weeks

### Teaching Load: Practical - 2Turns/week (3Hrs./ Turn)

WEEK	TURN	ΤΟΡΙϹ					
			COME				
		UNITI	01				
1	1	<ol> <li>Introduction to Engineering Drawing and Graphics</li> <li>1.1 Introduction to use and care of drawing instruments, drawing materials, layout and sizes of drawing sheets and drawing boards.</li> </ol>					
	2	<ul><li>1.2 Symbols and conventions</li><li>a) Conventions of Engineering Materials, Sectional Breaks and</li></ul>	CO1				
2	3	b) Civil Engineering Sanitary fitting symbols c) Electrical fitting symbols for domestic interior installations.	CO4				
	4	1.3 Geometrical construction-geometrical figures such as triangles, rectangles, circles, ellipses and curves, hexagons,					
3	5	pentagons bisecting a line and arc, division of line and circle with the help of drawing instruments.	CO2				
	6	<b>2. Technical Lettering of Alphabet and Numerals</b> Definition and classification of lettering, Free hand (of height of 5,8,12 mm) and instrumental lettering (of height 20 to 35 mm) :	CO2				
	<ul> <li>upper case and lower case, single and double stroke, vertical and inclined (Gothic lettering) at 75 degree to horizontal and with suitable height to width ratio 7:4</li> </ul>						
4	8	<ul> <li>3. Dimensioning</li> <li>3.1 Necessity of dimensioning, method and principles of dimensioning (mainly theoretical instructions).</li> </ul>	CO2				
5	9	3.2 Dimensioning of overall sizes, circles, threaded holes, chamfered surfaces, angles, tapered surfaces, holes, equally spaced on P.C.D., countersunk holes, counter bored holes, cylindrical parts, narrow spaces and gaps, radii, curves and arches.	CO2				
	10	<b>4. Scales</b> 4.1 Scales –Needs and importance (theoretical instructions), Type	CO2				
		of scales, Definition of Representative Fraction (R.F.) and Length	CO2				
6	11	of Scale. 4.2 To draw/construct plain and diagonal scales.					

		UNIT II	CO3
	12	1. Orthographic Projections	
		1.1 Theory of orthographic projections	
	12	1.2 Three views of orthographic projections of different objects	CO4
-	13	of given pictorial view of a block in 1st and 3rd angle.	
/	14	1.3 Projection of Points in different quadrant	CO4
	14		
		1.4 Projection of Straight Line (1st angle) i. Line parallel to both	CO4
	15	the planes. ii. Line perpendicular to any one of the reference	
		plane and parallel to others iii. Line inclined to any one of the	
8		references and parallel to another plane.	
		1.5 Projection of Plane – Different lamina like square rectangular,	CO4
	16	triangular, circle and Hexagonal pentagon. Trace of planes (HT	
		and VT).	
•	17	1.6 Identification of surfaces.	CO3
9	18	2. Sectioning	CO3
		2.1 Importance and salient features 2.2 Drawing of full section,	<u> </u>
10	19	half section, partial or broken out sections, Offset sections,	03
10	20	revolved sections and removed sections (theoretical only).	<u> </u>
	20		CO3
		UNIT III	03
	21	<b>1. Introduction of projection of right solids</b> such as prism &	
		pyramid (square, Pentagon, Hexagonal) cube, cone & cylinder	
11		(Axes perpendicular to H.P and parallel to V.P.)	
		<b>2. Introduction of sections of right solids</b> - Section planes,	CO5
	22	Sections of Hexagonal prism, pentagon pyramid, cylinder and	
		cone (Section plane parallel to anyone reference planes and	
		perpendicular to V.P. and inclined to H.P.)	CO5
	22	<b>3. Development of Surfaces</b> – Development of lateral surfaces	05
	23	or right solids like cone, cylinder, pentagonal prism, pyramid and	
12			<u> </u>
	24	UNITIV	04
		1. Fundamentals of isometric projections and isometric scale.	
	25	2. Isometric views of different laminaslike circle, pentagon	CO4
13	_	and hexagon.	
	26	3. Isometric views of different regular solidslike cylinder,	CO4
	_	cone, cube, cuboid, pyramid and prism.	
	27	4. Isometric views from given different orthographic	CO4
14		projections(front, side and top view)	
	28	UNIT V	CO1
	20	Introduction to AutoCADBasic introduction and operational	CO1
15	29	instructions of various commands in AutoCAD.	
13	30		CO1

	31	<b>Drawing of different objects on AutoCAD</b> (given pictorial/isometric view of a block).

# Lesson Plan

Computer Engineering 6th Semester Major Project 16 weeks Practical-15

		Theory		Practical
Veek	Lecture	Topic	Practical	Торіс
	Day	(Including	Day	
		Assignment		
		/Test)		
		,		
1st			1st	Selection of the Project Work
	N/A	N/A		
	N/A	N/A	2nd	Analyze & Study
	N/A	N/A	3rd	Analyzing the aptitudes and Interest of student
	N/A	N/A	4th	Detailed study of different project areas
	N/A	N/A	5th	Study of Previous Work Assigned
2nd				
	N/A	N/A	1st	Analyzing the usefulness and scope of the proje
	N/A	N/A	2nd	Reconsidering the alternate areas of project
				Discussion on Possibilities, Pros and Cons of
	N/A	N/A	3rd	the different projects
				Discussions on nature and scope of the
	N/A		4th	selected project assignment
	N/A	N/A	Sth	Study of Previous Work Assigned
3rd		21/2		Assessing the boundaries of the
	N/A	N/A	Ist	project assignment
		NI / A	2	Discussion on the Hardware and
	N/A	N/A	2nd 2nd	Solution of the Dreight assignment
	N/A	N/A	3ru 4+b	Selection of the Project assignment
	N/A	N/A	4(1) 5+b	Revisions and Rework
1+b	N/A	N/A	1ct	Foosibility Study of the colocted Projects
401			150	Discussion about different possibilities
	N/A	N/A		and limitations of the selected projects
				Studying the Project assignment and assessing
	N/A	N/A	2nd	the technical feasibility of the Project
	N/A	N/A	3rd	Study of Previous Work Assigned
	N/A	N/A	4th	Study of Previous Work Assigned
	N/A	N/A	5th	Study of Previous Work Assigned
5th		,		
0.01				Studying the Project assignment and assessing
	N/A	N/A	1st	the Behavioral and economic feasibility of the

	N/A	N/A	2nd	Study of Previous Work Assigned
	N/A	N/A	3rd	Study of Previous Work Assigned
	N/A	N/A	4th	Finalize the Project feasibility report
	N/A	N/A	5th	Study of Previous Work Assigned
6th	N/A	N/A	1st	<b>Planning of the Project-</b> selecting the tools and software's and Front/Backend, H/w to be used
	N/A	N/A	2nd	Assessing the availability of the tools and technical support for the project
	N/A	N/A	3rd	Selection of the software and Hardware for development of the project
	N/A	N/A	4th	Revisions and Rework
	N/A	N/A	5th	Study of Previous Work Assigned
7th	N/A	N/A	1st	Designing and developing & prototyping of the work
		N/A	2 m d	Generation of the SRS Document which include
		N/A	2nd 2rd	Deview Works Assording to the Project Work
	N/A	IN/A	31U 4+b	Review Works According to the Project Work
		N/A	4(1)	Review Works According to the Project Work
011	N/A	N/A	Sth	Review works According to the Project work
8th	N/A	N/A	1st	requirement of the project
	N/A	N/A	2nd	Review Works According to the Project Work
	N/A	N/A	3rd	Review Works According to the Project Work
	N/A	N/A	4th	Review Works According to the Project Work
	N/A	N/A	5th	Review Works According to the Project Work
9th				Development and Coding of the algorithms in the
	N/A	N/A	1st	language or software selected by the students
	N/A	N/A	2nd	Review Works According to the Project Work
	N/A	N/A	3rd	Review Works According to the Project Work
	N/A	N/A	4th	Review Works According to the Project Work
	N/A	N/A	5th	Review Works According to the Project Work
10th	N/A	N/A	1st	Review Works According to the Project Work
	N/A	N/A	2nd	Review Works According to the Project Work
	N/A	N/A	3rd	Review Works According to the Project Work
	N/A	N/A	4th	Review Works According to the Project Work
	N/A	N/A	5th	Review Works According to the Project Work
11th	N/A	N/A	1st	Review Works According to the Project Work
	N/A	N/A	2nd	Review Works According to the Project Work
	N/A	N/A	3rd	Review Works According to the Project Work
	N/A	N/A	4th	Review Works According to the Project Work
	N/A	N/A	5th	Review Works According to the Project Work
12th	N/A	N/A	1st	<b>Execution of the project:</b> execution of the project to assess its working
	N/A	N/A	2nd	Preparing real time and manual data for execution of the project
	N/A	N/A	3rd	Execution of the project and checking documentation
		NI / A	4th	execution of the Project and correction of any
	N/A	IN/A	401	enuis

	N/A	N/A	5th	Review Works According to the Project Work
13th	N/A	N/A	1st	Testing the developed Project
	N/A	N/A	2nd	Testing the Project on manually created data and detecting and correcting syntax and logical errors
	N/A	N/A	3rd	Testing the Project on real time data and compare the results with the requirements specified at the start of the project assingment
	N/A	N/A	4th	Review Works According to the Project Work and do necessary rework
	N/A	N/A	5th	Review Works According to the Project Work and do necessary rework
14th	N/A	N/A	1st	<b>Report Writing:</b> Deciding the format and Report layout
	N/A	N/A	2nd	Deciding the Chapterization scheme and topics to be covered
	N/A	N/A	3rd	Writing thr report as per the decided scheme
	N/A	N/A	4th	Writing thr report as per the decided scheme
	N/A	N/A	5th	Review Works According to the Project Work and do necessary rework
15th	N/A	N/A	1st	Writing thr report as per the decided scheme
	N/A	N/A	2nd	Evaluation of the report and Rework if needed
	N/A	N/A	3rd	Evaluation of the report and Rework if needed
	N/A	N/A	4th	Evaluation of the report and Rework if needed
	N/A	N/A	5th	Evaluation of the report and Rework if needed

#### LESSON PLAN

# DISCIPLINE: COMPUTER ENGINEERING SEMESTER: 2nd

SUBJECT: MULTIMEDIA APPLICATIONS LESSON PLAN DURATION: 14 WEEKS

## WORK LOAD (LECTURE/ PRACTICAL): LECTURES-2, PRACTICALS -4

WEEK	•	THEORY	•	PRACTICAL
1st	LECTURE	TOPIC	PRACTICAL	TOPIC
	DAY		DAY/PERIOD	
-				
_				
3				
,		4		J

1 UNIT 1 Introduction to Multimedia Systems	

	Concept of Multimedia, History of	

	Multimedia,	

	Specifications of different capturing devices,	

	Communication devices	

		motuning
		various multimedia
		devices:
		-Scanner
		- Digital camera

3rd	1	UNIT 2 Content and Project	

Planning, Designing and	

	development	

		Text encoding	 
4th	1	Audio encoding techniques	

5 <sup>th</sup>	1	Coding techniques for Moving Images, Editing	1-4	- Touch screen
	2	Editing of images audio		
		Editing of Text		
<b>6</b> <sup>th</sup>	1	Video Navigation		
	2	Graphics Navigation		

J		User interface designing	1-4	Plotter and printers
7th	1	Use of various codes like bar code,		
	2	QR code in multimedia applications.		
	L	REVISION	1-4	- DVD - Audio CD and Video CD
8th	1	UNIT 3 Using Image Processing Tools Photo-shop workshop,		-
1	່ 2	Image editing tools		
		Specifying and adjusting colors	1-4	Reading and writing of different format on CD/DVD
9th	1	Using gradient tools		
	2	Selection and move tools	1-4	Transporting audio and video files
		Transforming path drawing and editing tools		
10th	1	Using channels, layers, filters and actions		
	2	REVISION	1-4	Using various features of Flash
		UNIT 4 Multimedia Authoring Tools Types of Authoring programmes – Icon based		
11 <sup>th</sup>	1	Time based, Story boarding/scripting		
	2	Object oriented working in macromedia flash	1-4	Using various features of Photo-shop/GIMP
		Exploring interface using selection of PEN tools		
12th	1	Working with drawing and painting tools	1-4	Making multimedia presentations combining, Flash, Photo-shop, such as department profile, lesson presentation, games and project
	2	Applying colour viewing		
	J	Manipulating time line		
13th	1	Animating, Processing		7
	2	Guiding layers, importing	1-4	Generation and recognition of bar code & QR code using pre built application/mobile
4.445	4			
14th	1			Devision of Prosticula
	<u> </u> 4	REVISION	1-4	Revision of Practicals

• •

## Lesson Plan (DBMS)

Discipline: Semester: Subject : Lesson Plan Duration: (In hour): Computer Engg. 4th DBMS Work Load (Lecture/Practical) per week Lecture-03

	Theory				
Week	Lecture Day	Topic(including assignment/Test)			
1st	1ST	Database system: Introduction todatabase and its purpose			
	2nd	Characteristics of database, approach, advantage and disadvantage of database system			
	3rd	Classification of DBMS users: Actorson the scene- Database Administrators, Database designers,End users – System Analyst and Application Programmers			
2nd Workers behi 4th operator and maintenance		Workers behind the scene (DBMS system designers and implementers, tools developers, operator and maintenance personnel			
	5th	Data Models, Schemas, instances, Database state, DBMS Architecture:External level, Conceptual level, Internal level, Mappings			
	6th	Data Independence: Logical dataindependence and physical dataindependence			
3rd	7th	Database Languages, DBMS interfaces, Classification of DBMS- Centralized, Distributed, Parallel andObject Based			
	8th	Data modeling using E-R Model			
	9th	Data Model Classification: File Based or primitive models, traditional data Models, Semantic Data Models			
4th	10th	Entities and Attributes, Entity Typesand Entity Sets, Key Attribute and domain of attributes			
	11th	Relationship among entities , database design with ER model			
	12th	Revision of 1 <sup>st</sup> , 2 <sup>nd</sup> and 3 <sup>rd</sup> unit			
5th	13th	Relational model Concepts: Domain, Tuple, Attribute, Cardinality, Relation			
	14th	Keys- Primary, Secondary, Foreign, Alternate. Relational Constraints andRelational Database schemes			

	15TH	Domain Constraints, key Constraintsand Constraints on Null
6th	16th	Relational Databases and RelationalDatabase Schemes
	17th	Entity Integrity, Referential Integrityand Foreign Key
	18th	Comparison between ER Model and Relational Model
7th	19th	Trivial and Non Trivial Dependencies
	20th	Non Loss Decomposition and Functional Dependencies
<b>a</b>	21Th	First and 2 <sup>nd</sup> normal forms
8th	22th	Third normal form, BCNF, Denormalization
	23th	Revision of unit 4
	24TH	Revision of unit 5
9th	25th	Creating and using indexes, Creatingand using views
	26th	Database security, Process controls
	27TH	Database protection, grant and Revoke
10th	28th	DDL: Creating tables. Creating a tablewith data from another table
	29th	Inserting values into a table,Updating columns of a table
	30TH	Deleting Rows, Dropping a table
11th	31st	DML, Database Security and privileges, Grant and Revokecommand
	32th	Maintaining Database objects, commit and Rollback
	33RD	Various types of select commands
12th	34th	Various types of joins, sub query
	35th	Aggregate functions , Challenges ofMy Sql
	36th	Introduction to Big Data
13th	37th	Understanding Big data with samples
	38th	Revision of Unit 1
	39TH	Revision of Unit 2
14th	40th	Revision of Unit 3

	41th	Revision of Unit 4
	42nd	Revision of Unit 5
15th	43rd	Revision of Unit 6
	44th	Revision of Unit 7
	45th	Pre Exam Conduct

## Lesson Plan (OOPS Using JAVA)

Discipline: Semester: Subject : Lesson Plan Duration: (In hour): Computer Engg. 4th OOPS Using JAVA Work Load (Lecture/Practical) per week Lecture-03, Practical-03

WEEK		THEORY	PRACTICAL		
1st	LECTURE	ТОРІС	PRACTICAL	ΤΟΡΙϹ	
	DAY		DAY/PERIOD		
	1	UNIT 1 INTRODUCTION AND FEATURES	1-3	Consider we have a Class of	
		Fundamentals of object oriented		Cars under which Santro	
		programming		Xing, Alto and Wagon R	
	2	Procedure oriented programming Vs.		represents individual	
		object oriented programming (OOP)		Objects. In this context each	
				Car Object will have its own,	
	3	Object oriented programming concepts –		Model, Year of Manufacture,	
		Classes, object, object reference		Colour, Top Speed, etc.	
				which form Properties of the	
				Car class and the associated	
				actions i.e., object functions	
				like Create(), Sold(), display()	
				form the Methods of Car	
				Class. Use this class to create	
				another class Company that	
-				tracks the models it creates.	
2nd	1	Abstraction, encapsulation	1-3	In a software company	
	2	Inheritance, polymorphism		Software Engineers, Sr.	
	3	Introduction of eclipse (IDE) for		Software Engineers, Module	
		developing programs in Java		Lead, Technical Lead, Project	
				Lead, Project Manager,	
				Program Manager, Directors	
				all are the employees of the	
				company but their work,	
				perks, roles, responsibilities	
				differs. Create the Employee	
				base class would provide the	
				common benaviors of all	
				types of employee and also	
				that all amplauss must have	
				for that company Also	
				include search method to	
				search an employee by name	
3rd	1		1_3	Suppose the Airport	
510	-	Review of constructs of Cused in IAVA ·	T-2	nersonals want to maintain	
		variables		records for the arrival and	
	2	Types and type declarations	4	departure of the planes	
	3	Data types	1	Create a class Airport that	
	5			has data like name, id, and	
				has data like hame, id, and	

				address. Create two more classes for Arrival and Departure implementing Airport that will have track of planes (their name, id, arrival time or departure time and a counter to count the number of arrivals) also include the necessary methods to access the information. Also try to keep record of passengers by creating a new class Passenger. Also include a method search() in Airport
				passenger by name
4th	1	Increment operators	1-3	Create a whole menu driven
	3	Relational and logical operators		system using concept of OOP like classes, inheritance. Include information about the following: a. Patient -name, registration id, age, disease, etc.
5 <sup>th</sup>	1	If then else clause; conditional expressions	1-3	Create a whole menu driven hospital management
	2	Input using scanner class and output statement		system using concept of OOP like classes, inheritance.
	3	Loops, switch case, arrays, methods		Include information about the following: b. Staff – id, name, designation, salary, etc.
6 <sup>th</sup>	1	UNIT 3 CLASSES AND OBJECTS Creation	1-3	Create a class called Musicians to contain three
	2	Accessing class members		methods string ( ), wind ( )
	3	Private Vs Public Vs Protected Vs Default		and perc ( ). Each of these methods should initialize a string array to contain the following instruments: - veena, guitar, sitar, sarod and mandolin under string ( ) - flute, clarinet saxophone, nadhaswaram and piccolo under wind ( ) - tabla, mridangam, bangos, drums and tambour under perc ( ) It should also display the contents of the arrays that are initialized. Create a derived class called TypeInsto contain a method called get ( ) and show ( ). The get ( ) method must display a means as follows.

				Type of instruments to be displayed: a. String instruments b. wind instruments c. Percussion instruments The show () method should display the relevant detail according to our choice. The base class variables must be accessible only to its derived classes
7th	1	Constructors	1-3	Write three derived classes
	2	Object	_	inheriting functionality of
	3	Object Reference		base class person (should have a member function that ask to enter name and age) and with added unique features of student, and employee, and functionality to assign, change and delete records of student and employee
8th	1	UNIT 4 INHERITANCE	1-3	Using the concept of
		Definition of inheritance	_	multiple inheritance create
	2	Protected data	_	classes: Shape, Circle,
	3			Cylinder. Your classes may only have the class variable specified in the table below and the methods Area and/or Volume to output their area and/or volume.
9th	1	Order of invocation	1-3	Write a program to create
	2	Types of inheritance		class Person.
	3	Single inheritance		a. Make two classes, Student and Instructor, inherit from Person. A person has a name and year of birth.
10th	1	Multilevel inheritance,	1-3	Write a program to create
	2	Hierarchical inheritance	_	class Person
	3	Hybrid inheritance		b. A student has a major,
11 <sup>th</sup>	1	UNIT 5 POLYMORPHISM Method overloading	1-3	Write a program to create class Person
	2	Constructor overloading		c. An instructor has salary,
	3	Method overriding		subject.
12th	1	Up-casting	1-3	Write the class definitions,
	2	Down-casting	4	the constructors, set
	3	UNIT 6 ABSTRACT CLASS & INTERFACE Key points of Abstract class		for all classes.
13th	1	Interface	1-3	Old MacDonald had a farm
	2	Difference between an abstract class & interface		and several types of animals. Every animal shared certain
	3	Implementation of multiple inheritance through interface		characteristics: they had a type (such as cow, chick or

				pig) and each made a sound (moo, cluck or oink). An Interface defines those things required to be an animal on the farm. Define new classes for the Old MacDonald that implement the Animal and Farm class. Create array of object of animal to define the different types of animal in the farm. Also create appropriate methods to get and set the properties.
14th	1	UNIT 7 EXCEPTION HANDLING Definition of exception handling	1-3	Write a program with Student as abstract class and create derive classes
	2	Implementation of keywords like try		
	3	Catch, finally		Engineering, Medicine and Science from base class Student. Create the objects of the derived classes and process them and access them using array of pointer of type base class Student.
15th	1	Throw & Throws	1-3	Revision
	2	Importance of exception handling in practical implementation of live projects		
	3	KEVISION		
16th	1	TEST	1-3	Revision
	2	REVISION		
	3	REVISION		

#### **LESSON PLAN**

#### DISCIPLINE: COMPUTER ENGINEERING

#### SEMESTER: 4TH

#### SUBJECT: MICROPROCESSORS AND PERIPHERAL DEVICES

LESSON PLAN DURATION: 16 WEEKS

### WORK LOAD (LECTURE/ PRACTICAL): LECTURES-3, PRACTICALS -3

WEEK		THEORY	PRACTICAL	
1st	LECTURE DAY	ТОРІС	PRACTICAL DAY/PERIOD	ТОРІС
	1	UNIT 1 EVOLUTION OF MICROPROCESSOR		
		Typical organization of a microcomputer		
		system and functions of its various blocks		
	2	Microprocessor, its evolution	1-3	Familiarization of different keys of 8085 microprocessor kit and its memory map
	3	Function and impact on modern society		
2nd	1	UNIT 2 ARCHITECTURE OF A MICROPROCESSOR (WITH REFERENCE TO 8085 MICROPROCESSOR) Concept of Bus, bus organization of 8085	1-3	
	2	Functional block diagram of 8085 and function of each block		
	3	Pin details of 8085 and related signals		
3rd	1	Demultiplexing of address/data bus		
	2	Generation of read/write control signals	1-3	Steps to enter, modify data/program and to execute a programme on 8085 kit
	3	Steps to execute a stored programme		
4th	3	UNIT 3 INSTRUCTION TIMING AND CYCLES Instruction cycle		
	1	Machine cycle	1-3	Writing and execution of ALP for addition and subtraction of two 8 bit numbers
	2	T-states		
5 <sup>th</sup>	1	Fetch cycle	1-3	Writing and execution of ALP for arranging 10 numbers in ascending/descending order
	2	Execute cycle		
	3	TEST		
6 <sup>th</sup>	1	UNIT 4 PROGRAMMING (WITH RESPECT TO 8085 MICROPROCESSOR) Brief idea of machine and assembly languages		

	2	Machines and Mnemonic codes		
	3	Instruction format and Addressing mode	1-3	Writing and execution of ALP for multiplication and division of two 8 bit numbers)
7th	1	Identification of instructions as to which addressing mode they belong		
	2	Concept of Instruction set.		
	3	Explanation of the instructions of the following groups of instruction set - Data transfer group	1-3	Writing and execution of ALP for 0 to 9 BCD counters (up/down counter according to choice stored in memory
8th	1	Arithmetic Group		
	2	Logic Group		
	3	Stack	1-3	Interfacing exercise on 8255 like LED display control
9th	1	I/O and Machine Control Group		
	2	Programming exercises in assembly language	1-3	Interfacing exercise on 8253 programmable interval timer
	3	UNIT 5 MEMORIES AND I/O INTERFACING Concept of memory mapping		
10th	1	partitioning of total memory space		
	2	Address decoding	1-3	Practicing Programs on kit
	3	concept of peripheral mapped I/O		
11 <sup>th</sup>	1	memory mapped		
	2	I/O Interfacing of memory mapped I/O devices	1-3	Practicing Programs on kit
	3	I/O Interfacing of memory mapped I/O devices		
12th	1	<b>UNIT 6 INTERRUPTS</b> Concept of interrupt, Maskable and non- maskable	1-3	Interfacing exercise on 8279 programmable KB/display interface like to display the hex code of key pressed on display
	2	Edge triggered and level triggered interrupts, Software interrupt, Restart interrupts and its use		
	3	Various hardware interrupts of 8085, Servicing interrupts, extending interrupt system		
13th	1	TEST		
	2	UNIT 7 DATA TRANSFER TECHNIQUES Concept of programmed I/O operations, sync data transfer	1-3	Use of 8085 emulator for hardware testing
	3	Async data transfer (hand shaking),		
14th	1	Interrupt driven data transfer, DMA		
	2	Serial output data, Serial input data	1-3	Revision of Practicals
	3	UNIT 8 PERIPHERAL DEVICES 8255 PPI, 8253 PIT		

15th	1	8257 DMA controller		
	2	UNIT 9 ARCHITECTURE OF 8086 MICROPROCESSOR Block diagram - Minimum and Maximum mode	1-3	Revision of Practicals
	3	Pin and Signals		
16th	1	TEST		
	2	REVISION	1-3	<b>Revision of Practicals</b>
	3	REVISION		

## Lesson Plan for Even semester Govt. Polytechnic, Ambala City

**Faculty:** Munish Gupta (Theory (3P) + Practical(6P))

Discipline: Computer Engineering Semester: IV Subject: DATA STRUCTURES USING 'C'

Lesson Plan Duration: 16 weeks

#### Work Load (Lecture/ Practical) per week (in hours): L- 03, P - 06 + 06

Week	Theory	Practical
1 st	L-1 Introduction to d a t a Structure (Linear, Non-Linear,	[P-1] Operations on Arrays (Traversing insertion, deletion)
-	Primitive. Non-Primitive. Contiguous. Non-contiguous data	
	structures)

# Lesson Plan

# **Analog Electronics-II**

	Theory						
Week	Lecture Day	Topic(Including Assignments)					
Ist	1	Unit I Semiconductors and Diodes: Electrons- free and valence. Conductors, Insulators, and Semiconductors- definition & energy band diagrams.					
	2	Properties of semiconductors. Meaning of Hole current, electron-hole pairs, recombination, doping, acceptor and donor impurities.					
	1	Intrinsic and Extrinsic, N and P type semiconductors. Diode- formation, depletion region, VI Characteristics, ratings, types and applications. Zener diode- reverse bias characteristics,					
2nd	2	voltage regulation, shunt voltage regulator, and applications. Varistor and Thermistor working and applications.					
3rd	1	UNIT II <b>Transistors and MOSFETs</b> : Transistors- definition, terminals, types, symbols, formation of NPN and PNP, ratings.					
	2	Transistor biasing- definition, importance, list types, stabilisation, thermal runaway, heat sink, and voltage divider method					
4th	1	. List configurations and applications. Alpha and Beta- definitions, relation. CE input and output characteristics- cut off, saturation, and active Regions.					
	2	Transistor as a switch,List applications. FET- definition, types. MOSFET- definition, types, symbols.					
5th	1	N type enhancement mode- construction, working, characteristics, switch. List applications and ratings. Differentiate BJT and MOSFET.					
	2	REVIEW OF SYLLABUS DONE					
6th	1	First Sessional Test(Tentative)					
oui	2	First Sessional Test(Tentative					
7th	1	UNIT III Rectifiers, filters and regulators: Regulated power supply- block diagram and applications.					
	2	Rectifiers- definition, half wave, centre tapped and bridge full wave rectifier, efficiency, ripple factor, PIV, ratings.					
8th	1	Filters- definition, necessity, C and PI filters, Regulator-definition, working of 7805, operating voltages- 7809, 7812, 7905, 7912.					
	2	UNIT IV Amplifiers and Oscillators: Amplifier- definition, faithful amplification, classification based on configuration, power, and frequency.					
9th	1	Transistor CE amplifier with biasing. Working of class A, B, C, and Push pull amplifier.					
	2	Two stage RC coupled amplifier working, gain in dB, frequency response. Feed back- definition, types, advantages and disadvantages, applications					
10th	1	Oscillators- definition, classification, LC tank circuit, criteria. RC phase shift and crystal oscillator- working,					
	2	CRT- construction, working and applications.					
11th	1	Second Sessional Tests(Tentative)					
	2	Second Sessional Tests(Tentative)					

12th	1	UNIT V OP-AMP and Timers: OPAMP– definition, block diagram, operation, characteristics,
	2	applications, μA 741 pin diagram
13th	1	. Definitions of virtual ground, CMRR and Slew rate.
	2	OPAMP applications–inverting, integrator, differentiator, summer, voltage follower, and comparator.
14th	1	Filters- definition, Working- low pass, high pass passive and active filters, applications. Timers–
	2	block diagram, pin diagram of 555, duty cycle, time constant, applications. Multi-vibrators- Astable and monostable using 555.
15th	1	Third Sessional Test(Tentative)
	2	Third Sessional Test(Tentative)
16th	1	Revision of syllabus
	2	Revision of syllabus

## Lesson Plan

Discipline : Computer Engg.

Semester : VIth

Subject :- APPLICATION DEVELOPMENTUSINGWEB FRAMEWORK

Lesson Plan Duration :- 15weeks

Work load (Practical) per week (in hours) :- Practical-6

Note:-	GI and	GII	are the	respective	Groups	of students
	••••••	••••			0.00.00	0.000.000.000

Week	Practical			
	Practical	Topic		
	Group	·		
Week 1	G-I	Practice on HTML, CSS, Java Script		
	G-II	Practice on HTML, CSS, Java Script		
	G-I	Practice on Ajax.PHP & MySql		
	G-II	Practice on Ajax.PHP & MySql		
Week 2	G-I	Install WordPress & Create Blogs		
	G-II	Install WordPress & Create Blogs		
	G-I	Practice		
	G-II	Practice		
Week 3	G-I	Manage blogs features e.g. Images, Text Around Images, Comments, Post Formats, Linking, Pages, Categories, Smilies, Feeds, Gravatars, Password Protection
